#SH230

Chemstop™

Heavier-weight Super Flexible, PVC Gloves

#SH260L

#SH230

Chemstop™ gloves take the comfort, flexibility and fit of fully coated gloves to a new level; they have to be tried to believed. They are made from a premium, super-soft PVC formulation applied to seamless-knit 13-gauge cotton shells while over, ergonomically-shaped hand forms. The result are gloves shaped to your hands, meaning a lot less hand fatigue.

The SH models are blue, indicating a heavier weight of PVC that is still very flexible. This heavier, supported glove provides added oil resistance, while retaining the dexterity and tactile sensitivity of the lighter version. SH230 is 12" long, while the SH260L is 23" with elastic binding at the hem to keep gloves comfortably in place.

Available in **23" (#SH260L)** length, size large.
