Clutch Gear®

Mechanics Glove

#MXBU

Superior's Clutch Gear® mechanics gloves bring together some of the most sophisticated materials available today, for a high-functioning, form-fitting glove like no other.

Exo-Tekt water-repellant micro-suede palms bring together the best of both worlds: they're water-repellant, yet breathable; durable, yet soft; and best of all, highly flexible. Synthetic leather offers more dexterity and better performance than natural leather, especially in wet conditions, taking far less time to dry than natural fibers and staying supple after drying. The results are gloves that are incredibly lightweight. A performance patch over the thumb crotch reinforces what is the highest-wear area of any glove for longer lifespan. Neoprene padded knuckles protect the back of the hand against knocks and scrapes. Create a custom fit with adjustable Velcro tabs at the back of the wrists. Great protection and styling, all without sacrificing dexterity and touch sensitivity.

Also available in **black (#MXBL)** sizes S-2XL
