Hi-Viz Winter Mechanics Gloves

#MXHVTWT

Thinsulate™ INSULATION 100 gram 3M

Perfect for winter! In cold conditions, dry hands are warm hands, and these high-visibility winter mechanics gloves from our Clutch Gear® line have all the right stuff: a layer of 100-gram Thinsulate™; a water-resistant, breathable Enprotex® membrane that keeps wind and moisture at bay; and an inner layer of cozy fleece right next to your skin. The Enprotex® layer wicks moisture away from skin for dryness.

Lime-green backs are made from laminated spandex, for water repellency and give. Combined with a reflective chrome Neoprene strip across knuckles, the range of visibility is good in all lighting conditions. Palms feature PVC roughened patches for increased grip in wet or oily conditions. Neoprene backs and wrists for cushioned comfort and added warmth.
