PROSAT® Meltblown Polypropylene Wipes

Presaturated with 91% IPA and 9% DI water

Manufactured from meltblown polypropylene these PROSAT® presaturated wipes offer exceptional cleanliness. They are low in nonvolatile residues as well as particles and fibers. The use of presaturated wipes provides maximum process control.

Saturated with a blend of 91% isopropyl alcohol and 9% deionized water these wipes are an excellent choice for general surface cleaning where fast drying times are desired. The use of presaturated wipes reduces VOC emissions and solvent use up to 35% over spraying. The wipes are provided in convenient and easy to use peel and reseal pouches.

These wipes meet the requirements of USP<797> and IEST-CC-RP004.4 for “non-shedding, low-lint, lint-free wipes”.
