Dexterity®

Nitrile Dipped Work Gloves

CFIA
#S7NT

CANADIAN MADE Quality

ASTM ANSI ABRASION 3

ASTM ANSI PUNCTURE 4

FEATURES

- Offers abrasion and puncture resistance
- 100% cotton seamless knit shell
- Great comfort and dexterity
- Made in Canada

APPLICATIONS

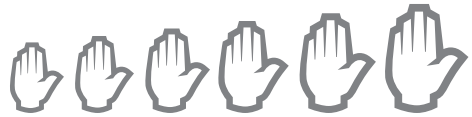

Automotive
Small Parts Handling
Maintenance
Construction

The tough nitrile dipped coating on Dexterity® gloves provides abrasion and puncture resistance. The combination of the unique 100% cotton seamless knit shell and the ergonomically designed curved hand and finger shape gives this glove impressive comfort and dexterity.

Nitrile is a co-polymer of acrylonitrile and butadiene. Because nitrile is one-hundred percent synthetic it is stronger than natural rubber, does not cause allergic reaction and therefore has a wider range of applications.
