FILTER, REGULATOR AND LUBRICATOR - 2 PC - 3/4" NPT - HEAVY DUTY

Product # **408808** | Model # **AFRLCH34**

- Space saving 2 piece modular filter, regulator combination and lubricator is by far the most popular air preparation unit
- A combination of 2 Modular units - Filter, Regulator and Lubricator, connected together using a spacer block with a built-in wall mounting bracket and piping adaptors
- Air filter is designed to eliminate dust, water and other impurities from reaching air tool, extending tool life
- Air regulator governs air flow to desired PSI air pressure
- Lubricator device is indispensable for air generated equipment, atomizing lubricant into the compressed air allowing it to reach and lubricate the internal parts of the air tool

TECHNICAL SPECIFICATIONS

Port Size	3/4"
Max. Flow	123 cfm (3,500 LPM)
Pressure Gauge Port Size	1/4"
