AUTO DRAIN VALVE - EXTERNAL - MINIATURE

Product # **408891** | Model # **ADVM**

- As a standard, all JET filters have a manual drain valve fitted on them, however, this can be changed with an automatic drain valve fitted externally to the bowl
- The auto drain valve drains the condensate water automatically. In addition to automatic draining, there is also provision in the valve for manual drain off
- Unlike an electrical auto drain valve, these float type auto drain valve's operate only when the condensate is collected and drains only the condensate
