Heavy-Duty Cellulose Sponge

Durable and less likely to crumble than a regular sponge, this multi-faceted cellulose sponge is a great choice for a range of commercial and industrial cleaning applications.

Cellulose sponges are much more eco-friendly than plastic sponges since they go through a less toxic manufacturing process and are completely compostable, which means they degrade in landfills. This Heavy-Duty Cellulose Sponge is 10 times more absorbent than a regular sponge and can be used to cleans dishes, countertops, appliances, tile, glass, showers, tubs and much more without shredding. It is durable and tear resistant. Need a sponge that is tougher on grime? Try the Heavy Duty Cellulose Sponge with Scour.

Product Features

- Tiny holes in the sponge absorb and hold liquid
- Resists bacterial odour
- Durable, tear resistant
- Eco-conscious choice
- Ideal for residential, commercial and institutional applications
