SolvStop™ | NE246FFL

Heat-resistant 18-inch extended-length chemical gloves for protection against caustics in maintenance tasks

ANSI/ISEA 105 A3 X 4 | ANSI 3 HEAT | WATERPROOF

ABOUT THE PRODUCT

Our SolvStop™ NE246FFL gloves are 18 inches long and offer protection against chemical and heat hazards. They're made from neoprene for protection against a wide range of chemicals, including acids, caustics, and oil. A fleece liner provides ANSI 3 heat resistance for protection from thermal contact, plus they offer 360° cut protection with ANSI A3 cut resistance. Extended-length gloves provide extra arm coverage plus diamond-grip textured palms offer steady grip.
