SolvStop™ | NE250TRC

Heat-resistant 20-inch chemical gloves with rubber cuff extension for protection against caustics in maintenance tasks

ANSI/ISEA 105 A3 4 3 | ANSI 3 HEAT | WATERPROOF

ABOUT THE PRODUCT

Our SolvStop™ NE250TRC gloves are 20 inches long and offer protection against chemical and heat hazards. They're made from neoprene for protection against a wide range of chemicals, including acids, caustics, and oil. An acrylic liner provides ANSI 3 heat resistance for protection from thermal contact, plus they offer 360° cut protection with ANSI A3 cut resistance. Extended-length gloves with additional rubber cuff extension provide extra arm coverage and a diamond-grip textured palms offer steady grip.
