# SolvStop™ | NIF3018SS

Chemical-resistant gloves that eliminate electrostatic paint spray-back

ESD WATERPROOF

## ABOUT THE PRODUCT

Our SolvStop™ NIF3018SS spray paint gloves offer chemical resistance and feature highly conductive continuous silver strips on palms that run from the inside of the glove to the outside to help ground workers and avoid paint spray-back. They feature flock lining and are fully coated in nitrile to protect against a wide range of chemicals, oils, fuels, and solvents. Their 12-inch length provides extra forearm coverage and a textured palm finish offers steady grip.
