KILFROST

ANTI-FREEZE AIR TOOL LUBRICANT

GRADE ISO 22

The KILFROST K400 anti-freeze lubricant helps to reduce costly down time and maintenance and ensures effective operation of pneumatic equipment in cold environments.

- Absorbs water or condensation in the air and eliminates the formation of ice
- Offers superior anti-wear ability
- Protects pneumatic equipment against corrosion
- Absorbs four times its own weight in water
- Safe to use with polycarbonate bowls, polyurethane or NBR seals
- Effective up to 245 PSI

No 69.900
473 ml

No 69.904
3.78 L

APPLICATIONS

Mining industry, forest industry, garage, construction

Air tools, air cylinders, valves, pumps, pneumatic equipment

HOW TO USE

Use the KILFROST K400 in a standard lubricator or an in-line lubricator. The lubricator should be installed within 5 meters of the application.
